

Pole-Line Removal

Railway Equipment Services, Inc. specializes in removing existing poles, cross-arms, and wire from railways. Our company is proud to say we have developed and perfected the art of removing poles!! We have even been able to get into areas that other contractors RUN from!! We not only cut poles down, but remove them and the debris from the area. We provide all equipment, workers, supervisors, fuel, oil, and parts to complete the job in a timely manner. We have designed equipment and attachments that allow our personnel to work fast and safe!! We are in and out before you know it. We can average up to 2 - 4 miles per day. Each job will have specific needs and those needs may vary. Call us and we would be glad to make a bid on a job for you! References available upon request.
